

Readme for “Can Gender Quotas Improve Public Service Provision? Evidence from Indian Local Government ”

August 4, 2023

All the analysis for this paper was conducted on Stata/SE 14.2 for Mac (64-bit Intel), Revision 29 Jan 2018, Copyright 1985-2015 StataCorp LLC.

Data Files Description

1. File named “mumbai_full.dta” contains the data needed to run one set of analysis on public services
 - (a) the folder contains “genindex1.do” that has the code required to create the summary indices.
 - (b) Use the “mumbai_std.do” file to run the analysis. This file uses “mumbai_full.dta” and generates the following tables and figures: Tables 1,2, 3, 4 (panel A), Appendix Tables: A.3,A.4, A.9, A.10, A.11, Figures 1, A.3,
2. Use the “6.fulldata_days_analysis.do” to the run the analysis. This file uses ”full-data_reshaped.dta” and generates the following tables and figures: Tables 4 Panel B , Figures A.1 all panels, Appendix Tables: A.12, A.13

R-Files Description

1. QJPS_Replication.Rproj – R project file to be opened first before conducting any analysis to ensure that the working directories are in order
2. 0-clean.R – Lines 1 through 669 cleans the raw data downloaded from <https://lokhaba.ashoka.edu.in/> (Jensenius and Verniers, 2017), and writes it to a .dta file titled all_india.dta (item two in Data Files Description above). Lines 672 through 699 merges the raw data with the control variables data found in BBS-Data.dta (item three in Data Files Description above). Running this code in its entirety generates final_data.dta.
3. 1-new_variables.R – This files takes final_data.dta. to process and create the dependent variable, exposure measures, and other relevant dummies necessary for final analysis. Running this code in its entirety generates final_panel.dta
4. 2-data_analysis.R – This file contains the main regressions and generates tables 4, A.5, A.6, A.7, A.8, A.9, A.10, A.11, A.12, A.15,
5. 7-cadreparty.R - This file contains data processing to analyse the role of parties. Generates Tables 6 (panels A & B) and 7 (Panels A &B), Figures 2 and A.5. This file uses proportions_assembly_wise in addition to final_data.dta
6. 9-gps.R – This file uses GPs.csv and final_panel.dta and generates Figure 1

Technical Notes:

Operating System: All the analyses were conducted on macOS Big Sur Version 11.6.2 (20G314)

R: .R files were analyzed on “R-Studio Version 1.3.1093 © 2009-2020 RStudio, PBC ”Apricot Nasturtium” (aee44535, 2020-09-17) for macOS”
